

FIGURE 1. PROJECT LOCATION

1. PROJECT DESCRIPTION

The project consists of the construction of a new 1.5-mile long, two-lane road with a 20-foot wide shoulder on the east side of the existing road. The road will be constructed to meet the design speed of 55 miles per hour. The road will be constructed in two phases. Phase 1 will consist of the construction of the road from station 0+00 to station 0+500. Phase 2 will consist of the construction of the road from station 0+500 to station 1+000. The road will be constructed on a 4% grade. The road will be constructed with a 12-foot wide travel lane and a 20-foot wide shoulder. The road will be constructed with a 4% cross-slope. The road will be constructed with a 4% longitudinal slope. The road will be constructed with a 4% cross-slope. The road will be constructed with a 4% longitudinal slope. The road will be constructed with a 4% cross-slope. The road will be constructed with a 4% longitudinal slope.
